---

## PROFILE

B.Sc. (Hons) Information Technology undergraduate at SLIIT with hands-on experience in full-stack web and mobile application development. Skilled in React.js, Node.js, Spring Boot, Java, PHP, MongoDB, and MySQL. Experienced in designing RESTful APIs, developing responsive user interfaces, and collaborating in team-based software projects. Seeking a Full-Stack Developer Internship to apply technical skills and contribute to real-world software solutions.

## EDUCATION

- **BSc (Hons) in Information Technology**  
Sri Lanka Institute of Information Technology (SLIIT)  
2023 – Present
- **G.C.E. Advanced Level (Arts Stream)**  
Thalduwe Buddhist (National) College Avissawella.

## SKILLS

- Programming languages: **JavaScript, Java, PHP, Python, C, C++**
- Frontend Technologies: **React.js, HTML, CSS**
- Backend Technologies: **Node.js, Express.js, PHP, REST APIs, SpringBoot, Python**
- Databases: **MongoDB, MySQL, pgAdmin4, Oracle SQL Developer**
- Tools & Platforms: **GitHub, Docker, Postman, Figma, Android Studio, VS Code, RStudio**

## PROJECTS

- **UniIntern | Student Management System**
  - Designed and implemented the student internship management module, allowing students to discover internship opportunities, apply online, monitor application progress, and manage interview schedules through an integrated platform.
  - Developed RESTful APIs and database operations to support the end-to-end application process.
  - Collaborated full-stack development by connecting backend services with frontend workflows for a seamless user experience.

**Technologies Used:** Spring Boot, Java, PostgreSQL, REST API, Node.js, React, CSS, HTML

**GitHub:** <https://github.com/JVliyanarachchi21/uniintern.git>

- **CoreGride (Smart-Campus) | Facilities & Assets Catalogue**
  - Developed an administrative dashboard for managing campus facilities and assets.
  - Built RESTful APIs and implemented CRUD operations with Node.js, Express, and MongoDB.
  - Enabled real-time facility visibility and asset tracking with robust data validation.

**Technologies Used:** React, MongoDB, Node.js, Express, SpringBoot, Java

**GitHub:** <https://github.com/Nadulahatharasinghe/it3030-paf-2026-smart-campus-20>

- **SwapNest | Item Exchange Platform**

- Built a second-hand item exchange platform with item listings and swap management workflows.
- Implemented user authentication, donation center management, real-time status tracking, and in app notifications.
- Performed unit testing, integration testing, and Performance testing to ensure system reliability and functionality.

**Technologies Used:** MERN Stack, Postman, REST APIs, Jest, Supertest, Artillery v2

**GitHub:** <https://github.com/Waruna-dev/SwapNest>

- **FixItNow | Maintenance Request Web Application**

- Developed a maintenance request management system for clients, administrators, and technicians.
- Implemented request submission, technician assignment, and real-time status tracking features.

**Technologies Used:** MERN Stack, Postman, REST APIs

**GitHub:** <https://github.com/zee544/FixItNow1>

- **DailyPulse | Habit Tracker Mobile Application**

- Designed and developed a wellness tracking mobile application using Android Studio.
- Implemented habit tracking, mood journaling, and hydration reminder functionalities.
- Added notification and home-screen widget support to improve user engagement.

**Technologies Used:** Android Studio(Kotlin)

**GitHub:** <https://github.com/zee544/HabitTracker>

- **PetPal | Pet Care Management UI/UX Design**

- Designed a mobile application prototype for pet care and wellness management using Figma.
- Created interfaces for vaccine tracking, grooming schedules, reminders, and pet growth monitoring.
- Applied modern UI/UX principles to improve usability and user experience.

**Technologies Used:** Figma

## CERTIFICATIONS

---

- Certificate in Electronics (E2) – Good Pass | Part-Time Training Programme  
Ceylon German Technical Training Institute
